## RURAL PUBLIC TRANSIT FTA Section 5311 Program

The Federal Transit Administration (FTA) Rural Public Transit Program assists states and localities in developing and expanding transit services in rural areas with populations of less than 50,000. In 2017, 21 sub-grantees, spanning 22 counties across the state of New Mexico, received Section 5311 funding.

**Ridership:** Estimated 1,615,621 annual passenger trips (October 1, 2016 to September 30, 2017)

**Equipment:** The smaller transit systems typically operate 8-15 passenger vans while the larger systems utilize 22-32 passenger buses. 185 vehicles have been purchased by Section 5311 sub-grantees from FY10 to FY17.

**Types of Services:** Fixed Route - travels a set route at scheduled times. There are 13 rural transit systems with fixed route service.

Demand-Response - offers rides on demand with a next day notice for transportation. There are 17 rural transit systems with demand response service.

Modified Fixed are routes that will deviate from their schedule with advanced notice. There are 5 rural transit systems with modified fixed route service.

**Fares:** Fares range from free to \$5.00 per one-way trip, depending on miles traveled.

**Governance:** The FTA allocates New Mexico's Section 5311 funding to NMDOT as the primary *grantee*. The NMDOT then conducts an annual application process by which it awards and administers funds to *sub-grantees* (e.g. public, tribal or non-profit entities) that qualify.

**Budget Requirements:** Sub-grantees are responsible for providing all required local match funds for grants they are awarded. There are four Section 5311 budget categories.

**Capital expenses** include the acquisition, construction and improvement of public transit facilities and equipment needed for a safe and efficient public transportation system.

**Administrative expenses** include expenses such as salaries; marketing expenses; insurance premiums; office supplies; occupancy and facilities costs, and equipment rental.

**Operating expenses** are those costs directly related to system operations.

**Planning expenses** include the costs associated with planning, research, and technical assistance. The program reimburses actual expenditures for each category on a monthly basis.

**Funding Requirements:** An 80/20 Federal/Local Match is required for Administrative, Capital, and Planning expenses, and a 50/50 match is required for Operating expenses.

For program year October 1, 2017 to September 30, 2018 a total of \$20,682,206 will be used to fund this program— \$18,399,938 of Section 5311 funds: \$10,216,130 in federal funds and \$8,183,808 in local matching funds and \$2,282,268 in Section 5339 State of Good Repair funds: \$1,825,814 in federal funds and \$456,454 in local matching funds.

For program year October 1, 2016, to September 30, 2017, federal (Section 5311 and Section 5339) and local program funds totaling \$23,317,535 were used to fund Administration, Operations, and Capital expenditures for Rural Public Transit programs.

**ENHANCED MOBILITY OF SENIORS AND INDIVIDUALS WITH DISABILITIES  
FTA SECTION 5310 PROGRAM**

The Federal Transit Administration (FTA) Enhanced Mobility of Seniors and Individuals with Disabilities Program funds assist in meeting the transportation needs of elderly citizens and individuals with disabilities. The program provides capital assistance to help meet these transportation needs. Under the federal transportation funding law, Moving Ahead for Progress in the 21<sup>st</sup> Century Act (MAP-21), the Section 5317 New Freedom Program has been consolidated into the Section 5310 program.

**Ridership:** 221,970 annual trips were reported for the program year October 1, 2015 - September 30, 2016 (last year available). Currently, 29 sub-grantees report ridership. Between 2009 and 2017, a total of 256 vehicles have been purchased under the Section 5310 program. Updated ridership for FFY 2017 is forthcoming.

**Equipment:** The smaller systems typically operate 6-15 passenger vans equipped with lifts/ ramps while the larger systems may utilize 22-32 passenger modified buses.

**Types of Services:** Demand Response rides are provided on demand to service to the subgrantee’s specific clientele.

**Fares:** No fares are charged in most cases.

**Governance:** States apply for funds on behalf of local private non-profit agencies and certain public bodies. The FTA allocates New Mexico’s Section 5310 funding to NMDOT as the primary *grantee*. **Budget Requirements:** NMDOT provides funding for vehicle purchases, small capital projects, capital equipment purchases, and operating assistance (for special projects). Sub-grantees are required to submit quarterly ridership status reports for vehicles purchased with Section 5310 funding. Sub-grantees are responsible for providing all required local match funds for grants they are awarded.

**Funding Requirements:** FTA requires a 80/20 federal/local match for capital purchases, and a 50/50 federal/local match for operating. Funded projects must be derived from the locally-developed, Coordinated Public Transit — Human Services Transportation Plan. The Plan was completed in May 2015 and is available to view at [http://dot.state.nm.us/en/Transit\\_Rail.html](http://dot.state.nm.us/en/Transit_Rail.html)

For the program year October 1, 2017 to September 30, 2018 a total of \$2,450,947 will be used to fund this program—\$1,960,757 of Section 5310 federal funds and \$490,190 of local match.

**Equipment:** 22 passenger cars, each containing about 150 seats, with bicycle and wheelchair accommodations are used in service. There are nine locomotives in the fleet. Train trips use two, three, four or five passenger cars.

**Operations:** The trains and the 100 miles of rail-road property, owned by NMDOT, are operated and maintained by Herzog Transit Services Inc. under contract to the Rio Metro RTD. The program is administered by the Rio Metro RTD under the terms of an Agreement with NMDOT.

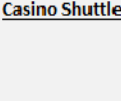

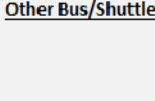

**Schedule/Stations:** The 15 current stations in service are: Belen, Los Lunas, Isleta Pueblo, the Bernalillo County/International Sunport, Sandia Pueblo, Downtown Albuquerque, Montañó, Los Ranchos/Journal Center, Downtown Bernalillo, U.S. 550/Sandoval County, Kewa Pueblo, NM 599, Zia Road, Santa Fe South Capitol and Santa Fe Depot/Rail Yard. Rail Runner currently operates 22 train trips on weekdays, 11 train trips on Saturdays, and seven train trips on Sunday.

**Fares:** A zone fare structure is used. There are six fare zones, with fares based on the number of zones in which a passenger travels. For example, \$10 is charged for a roundtrip between Albuquerque and Santa Fe (5 zones); \$11 between Santa Fe and Belen (6 zones); \$4 between Belen and Albuquerque (2 zones); and \$9 between Bernalillo and Santa Fe (4 zones). Discounted fares (usually half price) are provided for students (with a valid student ID), seniors age 62 and older and persons with disabilities. Children 10 and under ride free. Rail Runner tickets are sold on the trains and online. They are honored on the ABQRide, Rio Metro RTD, and Santa Fe Trails bus systems, as well as the Santa Fe Pick-Up and South Capitol Shuttle services in Santa Fe, for no additional fare. An NMDOT Park and Ride system-wide monthly pass (\$150 per month) is also honored on the Rail Runner for travel on any part of the system. Additional Rail Runner fare discounts can be obtained by purchasing passes online at [www.nmrailrunner.com](http://www.nmrailrunner.com). Systemwide fare increases were implemented in May 2012.

## Highway-Rail Grade Crossing Improvements: FHWA—NMDOT Section 130 Program

Each State receiving U.S. Federal Highway Administration (FHWA) funding is required to establish a “Highway-Railroad Grade Crossing Safety Improvement Program.” The program establishes priorities for addressing highway-railroad grade crossing hazards and guides the implementation and evaluation of remedial measures for railroad grade crossing safety. In setting priorities, the States are directed to consider and rank the dangers posed by highway grade crossings. Having developed a program, each State must evaluate its effectiveness and costs and file annual reports with FHWA.

### NMDOT’s 2017 Program

The 2017 program obligated four (4) individual railroad grade crossing improvement projects. These projects, undertaken by the railroad that owns or maintains the track at each crossing and reimbursed by the Section 130 Program, consists of the following:

- ◆ Full reconstruction of the Hall Street/NM 185 railroad grade crossing in Hatch, Dona Ana County, including the crossing surface, roadway approaches, adjacent roadway intersection, and replacement of obsolete flasher warning lights with new flasher warning lights and addition of gate arms.
- ◆ Full reconstruction of the Indian School Road railroad grade crossing in Albuquerque, Bernalillo County, including crossing surface, roadway approaches between Commercial and 2nd Street, and addition of two exit gate arms to create a four quadrant gate arm system.
- ◆ Replacement of obsolete flasher warning lights and adding gate arms at West O’Hara Road near Anthony, Dona Ana County.
- ◆ Adding flasher warning lights and gate arms at Ojo De La Vaca Road near Canoncito, Santa Fe County, converting this crossing from a passive warning (signs only) crossing to an active warning crossing.

As of November 2017, one project has been fully completed (West O’Hara), two projects have been substantially completed (Indian School and Hall Street) and the fourth project is expected to be completed by July of 2018 (Ojo De La Vaca Road).

### NMDOT’s 2018-2022 Program

The 2018—2022 program consists of thirty-nine (39) individual railroad grade crossing improvement projects with an estimated cost of \$10,760,523.80 as of November 2017. Most of these projects include one or both of (i) addition of automatic warning flasher lights and gate arms where only signs presently exist to provide warning, and (ii) the replacement of hazardous and worn-out grade crossing surfaces that are considered to be beyond their useful life expectancy. The majority of these projects are in the southeastern portion of New Mexico, where recent surges in economic activity have increased highway traffic and subsequently induced extreme wear and tear to railroad crossing surfaces.

## **Section 130 Program Requirements**

FHWA policies and procedures have rigid requirements for the approval of Section 130 Program funds for safety improvements at highway-rail grade crossings. For example, the State must maintain a current and accurate inventory of all public crossings within the State. The New Mexico railroad crossing inventory is web-based, providing users such as railroads, local agencies, and other stakeholders in highway-rail safety, immediate access to physical features, operational characteristics and accidents at each of New Mexico's 727 public grade road crossings. The Federal Railroad Administration (FRA) relies upon the New Mexico inventory as the official database for the State's participation in the USDOT Highway-Rail Crossing National Inventory.

FHWA policy for Section 130 authorization requires States to have adopted an approved method for prioritizing grade crossings for safety improvement projects. With the development of the current inventory database, the Rail Bureau ensures that all data elements included in the USDOT Accident Prediction Model are included.

Diagnostic Evaluations (field evaluations) are conducted for Section 130 highway-rail crossing projects. The NMDOT Rail Bureau participates with railroads and representatives of other public agencies in the identification and evaluation of all crossings included in Section 130 highway-rail crossing safety improvement programs. The Rail Bureau conducts field trips throughout the State and also meets with railroads, local agencies, citizens, city councils and other stakeholders to identify and prioritize candidates.

## **Project Selection**

The Rail Bureau uses several factors to select individual Section 130 projects, one of which are crossings identified by the FRA Accident Prediction Model as having the highest probability of a motor vehicle/train crash. The Accident Prediction Model assigns an accident prediction index to all public highway-rail grade crossings in New Mexico. Other factors include conditions observed in the field as well as accident history and concerns noted by local agencies, citizens, railroads, mayors, city councils, pueblo governors, county commissioners and NMDOT district offices. Once developed, an annual project list may be subject to adjustment to fit budgetary constraints.

## **NMDOT Section 130 Program Procedures and Guidelines Manual**

The NMDOT Rail Bureau released its "Section 130 Federal-Aid Highway-Rail Grade Crossing Safety Improvement Program Procedures and Guidelines Manual" in December of 2014. This manual describes the NMDOT Section 130 Program, and NMDOT's procedures for railroad crossing assessments and Section 130 program/project development. The manual also includes guidelines for railroad crossing standards — however, in many cases railroads will have their own grade crossing construction standards which will meet or exceed federal, state, and Manual on Uniform Traffic Control Devices (MUTCD) standards. The manual is available for download at [http://dot.state.nm.us/content/nmdot/en/Transit\\_Rail.html](http://dot.state.nm.us/content/nmdot/en/Transit_Rail.html) .
