Subject: [EXT] PROPOSED NEW RULE, 18.27.6 NMAC

In regards to the proposed rules the Local Government Transportation Project Fund:

The funds should advance the [New Mexico Climate Strategy](#) transportation (reducing VMT) and built environment (infrastructure investment) recommendations as well goals and policies in the [NMDOT 2040 Long Range Transportation Plan](#). These plans call for integrating land use and transportation planning, to promote complete streets, and fund transit as well as road improvements. As such, I believe the NMDOT Planning Bureau is the best agency to establish criteria and to evaluate funding proposals.

Thanks for your consideration,

Richard Meadows
