Michael R. Sandoval, *Cabinet Secretary*

FOR IMMEDIATE RELEASE

December 4, 2020

I-10 Fog Sealing from Las Cruces to Texas Stateline

LAS CRUCES – The New Mexico Department of Transportation (NMDOT) District One will begin Fog Sealing I-10 from Las Cruces to the Texas Stateline starting on Monday December 7, 2020.

Fog sealing is a single application of emulsified asphalt to an existing asphalt surface. This type of maintenance treatment can be valuable aid to renew weathered (oxidized) asphalt surfaces and improve the surface appearance, sealing minor cracks, surface voids, and inhibit unraveling. Most importantly help preserve the underlying pavement structure allowing the roadway to last for many years to come.

Traffic can expect lane closures starting eastbound moving to the westbound lanes from milepost 146 to 164(Texas Stateline) on the right driving lane and the shoulder, two lanes of traffic will remain open. Speed limits will be reduced and no striping will be in place. Once the outside driving lane and shoulder have been sealed crews will move to sealing both the middle and inside lanes as traffic allows.

The New Mexico Department of Transportation is committed to the safety of the traveling public and thanks you for your cooperation during this work. For updated information go to: New Mexico Department of Transportation at www.nmroads.com or call 511.
