

## ITS Project Development Process and the Systems Engineering Certification

This link will take you to the systems engineering training developed by NMDOT and FHWA. It provides an overview of system engineering requirements for Intelligent Transportation Systems (ITS) and how those requirements are met in New Mexico. It also covers the systems engineering certification required for all projects. This training is useful for anyone involved in the project development process from planning to project closeout.

1. To pause or re-start the presentation at any time, click the **Play/Pause** button
2. To advance or go back one slide at a time, click the **Forward/Back** arrows
3. To view the script for each slide, click the **Notes** button
4. To adjust the audio volume level, click the **Speaker** button
5. To go to a particular slide directly, click on the slide you want in the **Outline** or **Thumbnails** tabs
6. To search for slides that contain a particular keyword, click on the **Search** tab and enter a keyword
7. To open and print a copy of the course, click on **Attachments** for a printable PDF file.
8. To exit the course at any time, click the **Exit** button
