

Yellow Toadflax: Yellow toadflax is a native Euroasia, introduced to the United States in the mid-1800s as an ornamental. This creeping perennial is an aggressive invader of rangelands, displacing desirable grasses. It is also found along roadsides, waste and cultivated fields. An extensive root system makes this plant difficult to control. Yellow toadflax is known to spread aggressively and can displace desirable grasses. Yellow toadflax is difficult to eradicate, due to its extensive root system. Also, yellow toadflax is suspected to be mildly poisonous to livestock.
